## IT Security Solutions

**Sealog** - The digital tracking tool for data and information protection and excellent for monitoring industrial processes, analyze environmental parameters

**IntelliFood** - as intelligent software solution is able to detect and keep record on the internal and external parameters together having impact on the quality and food safety of the products.

**IntelliFleet** - modular fleet controlling based on objective measurements executed in vehicles and complex fact data analysis

## Intelligent Buildings

**ENERGY MONITOR and MANAGEMENT** - designed for energy and facility management experts as well as environmental and financial managers to support investment decisions, energy use optimization and cost sharing.

Complex facility management system like development, deployment and operation of hardware- and software components, unique system solution for infrastructure- and building management.

## agrolT

AGROSENSE - changes the technology of plant growing And combines the precision soil state measurements and insect presence observations with the latest science results of irrigation and fertilization control, thus improving the farming technology.

## Integrated Monitoring Solutions

**MOHANET solutions** for monitoring service

Alarm system

Fire and CO protection system

Vehicle monitoring for cars and trucks

Elderly, Child & Health monitoring

Bicycle monitoring

Solar panel and temperture monitoring

Suction-pump & aggregator monitoring

Elevator monitoring

**Industry 4.0 – smart solutions by networking**
